The Government of the United States submitted
a "SUGGESTED CHARTER for the International
Trade Organization" TO THE SECRETARY
General of the United Nations and to the other
governments named by the Economic and
Social Council to serve on the Prepara-
tory Committee. THIS CHARTER CONTAINS
several deviations from the idea of the under-
lying the original proposal. THE most
important ones are TO BE FOUND IN
Chapter VI "International Commodity
Arrangements". In Art 41 in this chapter
it is suggested THAT THE members of ITO

This experience is not limited to the

relation between the same type of product - natural and synthetic. It covers all types of product exchange in the private market for the

same purpose. The technical uses of the same periods changed the real stream out of natural and certain synthetic products to an extent not described yet: e.g. the real stream of

oil. Their price does co-incident with the ^{problem of correspond} technical uses of oil, may be
