

HEADQUARTERS  
U.S. FORCES, EUROPEAN THEATER  
MILITARY GOVERNMENT U.S. ZONE  
INDUSTRY BRANCH

AFG 757  
8 October 1945

MEMO TO: Major Gottlieb.

In the matter of scientists and technicians brought from the Russian Zone into this zone, Captain Fisher of FIAT informed me that on requests of many agencies the date of 10 October has been extended to 1 November. That relieves us of important requests. However the period between now and 1 November is much too short to get our screening thru, therefore I suggest that the list built up to under the aspects of the place where the people are billeted, be sent to each Military Government Detachment for screening purposes. On or about October 20th, a decision should be made whether a formal extension has to be requested or whether informal extension can be reached. Captain Myers, after my departure, will remind you of this in proper time.

H. KRONSTEIN,  
Chief, German Agencies.
